## **IN THE CLAIMS**

Please cancel claims 1-29, 32, 39-43, 50-100 without prejudice to their prosecution in a related application.

Please amend claims 30, 31, and 33 as indicated below.

The pending claims are then believed to be as follows:

- 1-29. (cancelled)
- 30. (currently amended) A method according to claim 29 31 wherein said intervertebral disc implant consists essentially of disc annulus material.
- 31. (currently amended) A method of augmenting or replacing an intervertebral disc nucleus, said method comprising the steps of:
- (a) providing an intervertebral disc implant comprising allogenic or xenogenic disc annulus material that is substantially free of both disc nucleus material and disc endplate material; and
- (b) implanting said intervertebral disc implant in an intervertebral disc nucleus space;

wherein said intervertebral disc implant comprises allogenic or xenogenic disc annulus material that comprises a whole disc annulus.

- 32. (cancelled)
- 33. (currently amended) A method according to claim 29 31 wherein said intervertebral disc implant further includes allogenic or xenogenic anterior longitudinal ligament.

- 34. (original) A method according to claim 33 wherein said allogenic or xenogenic anterior longitudinal ligament is attached to said allogenic or xenogenic disc material.
- 35. (original) A method according to claim 33 wherein said allogenic or xenogenic anterior longitudinal ligament has free ends extending outward from said allogenic or xenogenic disc material.
- 36. (original) A method according to claim 35 wherein said free ends of said allogenic or xenogenic anterior longitudinal ligament are wrapped around said allogenic or xenogenic disc annulus material.
- 37. (original) A method according to claim 35 wherein the free ends of the allogenic or xenogenic anterior longitudinal ligament are secured together.
- 38. (original) A method according to claim 37 wherein the free ends of the allogenic or xenogenic anterior longitudinal ligament are secured together with sutures, staples, or an adhesive.

## 39-43. (cancelled)

- 44. (original) A method according to claim 31 wherein said whole disc annulus is folded or rolled into a more compact structure.
- 45. (original) A method according to claim 44 wherein said whole disc annulus is cut to facilitate folding or rolling the annulus into a more compact structure.
- 46. (original) A method according to claim 44 wherein said whole disc annulus is dehydrated after folding or rolling into a more compact structure.
- 47. (original) A method according to claim 44 wherein said whole disc annulus is sutured or glued after folding or rolling into a more compact structure.

- 48. (original) A method according to claim 31 wherein said whole disc annulus is wrapped in a jacket or wrap.
- 49. (original) A method according to claim 48 wherein said jacket or wrap is made of allogenic or xenogenic tissue.
- 50. (withdrawn) A method according to claim 48 wherein said jacket or wrap is made of a synthetic material.

51-100. (cancelled)
